Courseguide

Economics (/ ɛ k ə ' n ɒ m i k s, i: k ə-) is the social science that studies the production, distribution, and consumption of goods and services.. Economics focuses on the behaviour and interactions of economic agents and how economies work. Microeconomics analyzes basic elements in the economy, including individual agents and markets, their interactions, and the outcomes of interactions.

Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science.Originally, it addressed zero-sum games, in which one person's gains result in losses for the other participants.Today, game theory applies to a wide range of behavioral relations, and is now an ...
